DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches an apparatus for reproducing information recorded on an optical disk which is provided for recording data of a signal modulated according to a predetermined modulation method in a form of concavo-convex pits and teaches said optical disk with an area having a reflecting film partly removed or said area recorded with pits which are different from pits satisfying requirements of said predetermined modulation method.

Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest either alone or in combination where an apparatus for reproducing information recorded on an optical disk which is provided for recording data of a signal modulated according to a predetermined modulation method in a form of concavo-convex pits, said optical disk provided with a first area having a reflecting film partly removed, and provided with a second area for recording pits which are different from pits satisfying requirements of said predetermined modulation method, specifically the apparatus comprises a **first and second comparator** for comparing the reproduced signal from said optical disk upon reproducing information recorded in **said second area**, with a **predetermined first and second threshold values**, outputting a **first and second comparison result signal**, wherein said first area detecting circuit judges whether or not said first area is detected in accordance with whether

or not a first number of data from a predetermined sector address to said detected first area, which is counted based on the reproduced signal from said optical disk upon reproducing information recorded on a track including said first area, substantially coincides with a second number of data from said predetermined sector address to said detected first area, which is counted based on a reproduced signal from said optical disk upon reproducing information recorded on a further track including said first area and adjacent to said track.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
